

We publish details of contracts awarded over £5,000, and at the end of the financial year update with the actual amounts paid.

For Electricity and Gas supplies we use free broker services or negotiate prices ourselves. A full list is available on request which includes the rates and contract lengths. We currently use British Gas, EON, BES Utilities (up to July 2019) and Haven Power.

For water we used Wave Business.

All utilities are paid by direct debit and the amounts can be found on our regular expenditure reports if they are over £500 per transaction. Utilities are variable based on consumption apart from Haven Power for 189 streetlights which is fixed at £2,499 pa for three years from October 2019
